File, Destructor Sys.
[redacted] aircraft

14 February 1958

Attention: [redacted]

Dear [redacted]

As we discussed at [redacted] last week, I have reviewed our requirements for detonating cord connectors and the following table indicates the quantities called for under Task Orders II and III. Also included are the quantities on hand and the number that we would like delivered to us after your testing has been completed.

Item	TO II Amend I	TO II Amend II	TO III	TOTAL Proposed	ON Hand (Jan '58)	DELIVERY REQ'd
Elbows	0	300		300	300	- 300
Tees	200			200	300	480
Long Unions	200			200	300	- 300
Short Unions	200			200	300	390
Locking Nut	800			800	2800	2160
Webbed Unions	0	300		300	0	- 450
End Caps (Short)	800	150 (1)	200	1150	0	1770 (3)
End Caps (Long)	0	150 (2)	200	350	0	390 (4)
Double Tees	0	300		300	0	0

- (1) 1" long
- (2) 1 1/4" long
- (3) 3/4" long
- (4) 2.390" long

Due to the testing that is currently taking place, the on hand quantity will no doubt be less than that shown. Also, any further testing contemplated should be considered in your estimate of the overall quantity to be made before delivering the stated quantities to us.

Page 2

This amendment will supersede the previous ones and should state the quantities to be delivered to us and the amount of money and time required to do this over and above what has previously been authorized. It should also be written broad enough to allow you to perform adequate testing and evaluation of all components involved.

If you have any disagreement with the facts in the table or misunderstandings as to what we are asking, please contact me by phone so that the work may be continued with minimum delay.

Very truly yours,

JWD

Warren
